OVERVIEW

The 2022 **Improving Practice in ObGyn Annual Symposium** assembles a group of experts to speak on a wide range of topics including improving communication, safety and outcomes in obstetrics; reconsidering the role of race in clinical medicine, patient safety and clinician well-being; assisted reproductive technology; helping women with fistulas resulting in childbirth; and nutrition and obesity in ObGyn.

LEARNING/PERFORMANCE OBJECTIVES

At the conclusion of this course, learners should be able to:

- **Describe the relationship** between provider communication and clinical outcomes.
- **Identify 3-5 Communication Best Practices.**
- **Implement recommended communications improvement strategies** within their own practices.
- **Review background of race/ethnicity** in clinical medicine.
- **Review negative and positive impacts of using race** in clinical medicine.
- **Identify the medications available to treat obese patients** and when to consider referral to obesity medicine or bariatric surgery specialists.
- **Identify risk factors and symptoms of clinician burnout.**
- **Relate safety risks to patients posed by clinician burnout.**
- **List the treatment approaches** for Polycystic Ovary Syndrome (PCOS).
- **Describe the risk factors** for vesicovaginal fistula.
- **Relate criteria for recognizing fistula in a patient.**
- **Discuss the long term complications of fistula.**
